Experience

5 Years,
8 Months

VALD

Software Engineer

Present → June 2023

Achievements

- Architected and developed a new feature across multiple microservices, ensuring seamless integration and data flow.
- Migrated the team's entire codebase from Bitbucket to GitHub and transitioned off of Jenkins for CI/CD, which streamlined our development workflow and improved build efficiency.
- Contributed to the initial design and ideation of a new 'favourites' feature, and led the full-stack implementation.

A2B Australia

Full Stack Developer

June 2023 → Jan 2021

Achievements

- Independently maintained and developed features for business-critical financial infrastructure, demonstrating a high degree of technical ownership and reliability.
- Designed and developed Power BI dashboards to deliver high-level financial insights, empowering leadership to make data-driven decisions for a publicly traded company.
- Architected and delivered solutions for large-scale, data-driven systems, with designs validated and approved by senior business architects.

Claim

Web & App Developer

Jan 2021 → Mar 2020

Achievements

- Spearheaded the design, development, and launch of a full-stack mobile application and web front-end for a startup, including all payment functionality via Stripe.
